Unsure whether to send your child into school or not? With winter fast approaching, it can be hard to know whether to send your child into school or not.

It is usually appropriate to send children to school with mild respiratory illnesses. This would include general cold symptoms: a minor cough, runny nose, or sore throat. However, children should not be sent to school if they have a temperature of 38°C or above. Follow the link for further information on when it is appropriate to send your child to school.
